

rapidconnect® 3 Hole Fibre Optic Cable Stripper

rapidconnect
BY ANDERSON

rapidconnect® 3-Hole Fibre Optic Cable Stripper features three distinct stripping holes, each designed for a specific cable size. The first hole handles 250-micron coatings, the second is perfect for 900-micron buffer tubes, and the third accommodates 2-3mm cables. This versatility allows you to strip different types of fibre optic cables with a single tool, making it a valuable addition to any toolkit.

Designed for precision, the 3-Hole Fibre Optic Cable Stripper ensures accurate stripping without damaging the delicate fibres inside. The precisely engineered stripping holes cleanly remove the coatings, leaving the fibre intact and ready for termination or splicing. This precision is crucial for maintaining the integrity of the fibre optic cables and ensuring optimal performance.

Application:

- Ideal for Fibre Optic Technicians
- Telecommunication Networks
- Enterprise and Industrial environments

Features:

- Durable construction for long-lasting performance
- Handles 250-900-Micron and 2-3mm cables
- Versatile – suitable for a variety of materials
- Ergonomic design reduces hand fatigue
